# I Who are we?

We are a primary service provider to the oil and gas offshore industry. Based in Ras Al Khaimah, on the eastern coast of the United Arab Emirates. Our primary clients are based in the Arabian Gulf; we serve major industry players worldwide.

# II A Brief History

We began as Arch Ship Management, Dubai, in 2003. After 3 years of rapid growth, we increased our scope of activities, and began to serve a wider section of the industry.

Arch Shipping was incorporated in October 2007, in Ras Al Khaimah, a growing offshore, oil and gas hub in the Middle East

As of March 2010, we've seen a rapid increase in our market share. Our goals for 2010 are to acquire, develop and operate value-based assets, to serve our clients better.

# III What do we do?

The United Arab Emirates is an ideal base for our operations. It is a leading hub for the oil and gas industry, and is the perfect platform for our expertise and experience.

What we do best is towage and repositioning of offshore equipment, rigs, ships and barges.

We are firm believers in the Six Sigma ideology of continuous improvement. We are tailored for cost-efficiency, max. productivity and unmatched service.

# Primary Services

## Towage

Worldwide towage capabilities.

Towage on lumpsum or pro-rata.

Currently manage 2 ocean tugs.

Upon request, we can offer:

Ship Management  
Cargo and Ship Surveys  
Risk assessment  
Crewing and Manning

Ship repairs and refurbishment  
Procurement of oilfield supplies

Industry reports

# Prestige Projects

## Refurbishment of Umm Qasr container cranes

Our clients were a US Govt. contractor, awarded with refurbishment of Iraq's dilapidated gantries.

We provided logistics and secure accommodation for project personnel onboard a chartered tug, as well as on-site project supervision.

Our personnel were present in Iraq all through the project, and were instrumental in bringing these war-damaged units to life, increasing the capabilities of the port of Umm Qasr.

Scope of work included:

- + Renewal of damaged structural steelwork
- + Testing and repair of electrical control panels
- + Refurbishment and installation of spreaders
- + Securing high-voltage connection inside the Port of Umm Qasr
- + Establishing a secure perimeter around the gantry the cranes, to prevent sabotage and further damage

## Towage of CGG Amadeus from Jebel Ali to Iran

Co. Generale de Geophysique (now CGG Veritas) has positioned their cable laying/research vessel, CGG Amadeus in the Middle East, for research and cable laying operations.

Due to technical difficulties, the vessel had to be towed to Jebel Ali, UAE. After repairs, the vessel was towed to Iran, where it would resume the assigned project.

We arranged towage of the CGG Amadeus, and successfully completed the towage, incident free, inspite of heavy monsoon conditions and rough seas.

---

## Piling operations in Fujairah Port

### Hire of tug and repositioning of Tidal Marine's Crane Barge "Marabou"

The clients' primary requisition was to provide assistance during piling operations in port of Fujairah. We undertook the entire piling operation, leading to successful completion.

We assisted project personnel in lifting and installation of detachable crane boom during piling operations.

---

# Other Projects

- + Hyundai: Offshore deliveries of fresh water, fuel, provisions and chemicals.
- + VOPAK Horizon Fujairah: Towed two barges in tandem from Arabian Gulf to Fujairah.
